The Company, its affiliates, agents and advisers undertake no obligation and do not intend to update any forward-looking statements in this presentation to reflect events or circumstances after the date of this presentation.

Introduction

The Group delivered a strong operational performance for the period. This has been brought about by:

- Continued focus on the strategic core business: the production, processing, distribution and retailing of its cold chain food products.
- · Aggressive expansion of its retail network.
- Effective cost control throughout the Group.

This combined with a relatively stable exchange rate and the final settlement reached with the Zambian Revenue Authority (ZRA) over the historical disputed Zamanita tax liability, has resulted in a Net Profit After Tax of US\$ 9 million (2015: US\$ 3.4 million Loss).

It is pleasing to have achieved the above in spite of a rapid increase in inflation during the period and a national electricity deficit which resulted in load-shedding which in turn negatively impacted production.
